SOMEBODY AVAILABLE NOW**

"Music has been a constant in my life through everything I've experienced. When I'm going through things, I look to songs that are relatable to my situation that help me in the process. I really want my music to be that for other people." The inspiration behind the song, "Somebody's Somebody" came from the feeling of wanting someone to be talking about me when they say "I've met someone". You hear all these songs about "you're my everything", or "you're my someone" and I remember thinking "man, will I ever be somebody's somebody one day?"

"The recording of the song is just as raw, beautiful, and vulnerable as it's lyrics; with only Noah's vocals and an acoustic guitar. The song speaks for itself and stands effortlessly on its own without the need for a giant production. A wonderful concept and one that can be felt by many, "Somebody's Somebody," is a truly great song!

- Rachel Sellick 

Nashville recording artist, Noah Garner, is one to watch! His sophomore EP, Spring Break Town, released through a global distribution deal with Mercia Records/Sony Orchard. It garnered Noah multiple features including Spotify editorial playlists, Taste of Country, CMT, and WSM Opry Radio artist spotlight. Noah followed with his single, Somebody's Somebody, which has amassed over 1.84 MILLION streams and climbing. He recently signed a global publishing deal with LA/Nashville based, Deluge Music. Noah maintains his high-energy, dynamic performances over 260 live shows per year.
